On the road – and nevertheless really good cooking

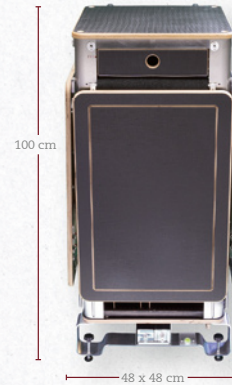

For many campers, cooking and eating is a highlight of the day – too bad, that many kitchens are not only small, but are often impractical. Cooking very well on the way: that's possible with fliX Camper:

fliX Camper is based on GastroNorm (GN) – the international device standard of the pros.

No matter if preparation, cooking or grilling – standardized gastro devices and boxes ensure order and flexibility – in best professional quality.

So that you can cook just as well as you would at home – or better ;)

fliX Live Camper Storage mode & transport size

GN water station: sink & drainboard

GN chopping station with 6 GN boxes

Simple & ingenious: multi-funtionality with GN

fliX Live Camper is the first mini kitchen with the GastroNorm (GN) standard of the professionals. For well-organized, relaxed cooking – even for the highest demands.

How does that work?

The slender kitchen is equipped with three large fold-out wings – each wing is multi-functional.

First, you can use the wing as a table. If necessary, you can open the wing and put in GN equipment or GN boxes.

Here are some examples – more devices are available.

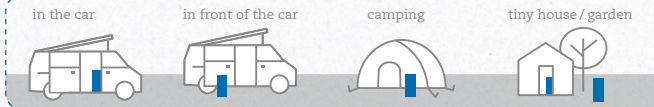

Cooking: gas, electric stove, induction

GN charcoal / gas grill

Where to use Camper

Handle with integrated wheels – for easy loading & unloading, even for one person

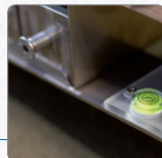

Cooking utensil holder – well organized

Large 12 l tank with integrated soap dispenser

Built-in lighting – operation via socket or power bank

The equipment is stored – well secured – inside the corpus

Stable due to additional weights, water level

Waterproof sockets
Cleverly adjustable feet

Scope of delivery
